The permit was jointly written by both EPA and LDEQ because the facility discharges both into federal and state waters. The permit is currently at public notice which ends 7/28/08. The LDEQ's permit writer is Sonja Loyd (225) 219-3090 and I am the EPA's permit writer. Go to the following URL for permit information.

http://www.deq.louisiana.gov/apps/pubNotice/default.asp

Let me know if you have any other question. Thanks.

Subject NPDES Application for LOOP Project

Hi Maria.

On May 26, 2008 an associate of mine at ENSR (Jamey Hollingsworth) attended a meeting at Region 6 at which details of Enterprise Product Partners' proposed Texas Offshore Port System project were presented to EPA. I understand that both you and Barbara Keeler were present at the meeting.

I work with Jamey at ENSR and am responsible for the "water" components of the Deepwater Port application and for any NPDES permitting that might ultimately be required. Jamey's notes from the meeting indicate that Region 6 has received and is reviewing the NPDES renewal application for the Louisiana Offshore Oil Port (LOOP) project, an existing facility that is somewhat similar to that proposed by Enterprise.

Could you possibly provide a copy of this LOOP NPDES renewal application to me? I believe it is public information, however, I have had no luck finding an electronic copy anywhere on the internet.

Any help you could provide would be much appreciated. Please do not hesitate to call or email me should you have any questions.

regards,

tony silva
